

NEXT LEVEL SAFETY

The Next Level Safety Program is for business leaders who are seeking a fresh perspective on safety leadership, performance and results. We bring a contemporary and cutting edge approach, to deliver a safety asset that spans across all business levels: operator, contractor, manager and executive.

At Coretex Group, we work with your leaders to harness the greatest safety resource - your people.

WE DESIGN CUSTOMISED SAFETY LEADERSHIP AND CULTURE PROGRAMS TO:

- » Build the skill sets to embed safety leadership as a core capability;
- » Tap into the collective intelligence of your people to identify new and safer ways of working;
- » Develop communication tools to challenge, support and engage;
- » Create the conditions for psychological safety in your teams;
- » Challenge old mindsets and unlock a new way of thinking;
- » Create the momentum for cultural change through conversation and action;
- » Embed safety leadership practices into your existing risk management systems and processes.

We integrate contemporary thinking and practice across the fields of neuroscience, psychology, risk, safety science and human factors.

THE CORETEX APPROACH TO FACILITATION

- ① Interactive, engaging and high energy facilitation.
- ② Tailored to a range of learning styles to increase understanding, participation and application of learning.
- ③ Delivery of practical tools and techniques integrated into day-to-day thinking and action.
- ④ Scientific-based approaches that are balanced with experience and practical application.
- ⑤ Focus on real business challenges and opportunities.

NEXT LEVEL SAFETY PROGRAM

NEXT LEVEL SAFETY PROGRAM

PROGRAM TOPICS INCLUDE:

NEXT LEVEL INSPIRATION

The journey to the next level begins with inspiration. Inspire translates to 'in spirit' and comes from within. We discover and share our personal drivers for the next level. We re-energise our focus and commitment to health and safety.

NEXT LEVEL MINDSET

Next Level requires a new way of thinking about safety. In this session we introduce 4 new mindsets that underpin a next level safety culture. We challenge existing beliefs about safety and human performance. We leave this session with a new mindset and a fresh perspective on what is possible.

NEXT LEVEL DAILY LEADERSHIP

In this session, we develop and practice daily leadership practices. We take on the role of safety story tellers, and find new ways of engaging others through daily conversations and leadership.

NEXT LEVEL CULTURAL CONDITIONS

We extend our focus to the conditions that underpin a next level safety culture. We focus on two conditions: psychological safety and collective intelligence. With these conditions in place, we unlock ideas and increase safety-critical thinking and innovation.

NEXT LEVEL ACTION & IMPACT

We share our formula for making this program stick! You will learn new habits and importantly how to integrate them into your daily practice. This is about everyday results and ensuring your success in achieving the next level safety culture and performance.

NEXT LEVEL RISK MANAGEMENT

We apply a next level approach to risk management. We look at the psychology of risk and decision making. We apply these new insights to increase the quality and impact of your risk management tools.

EMBEDDING ACTIVITIES AND ACTIONS

The effectiveness of any asset is the value it adds to your business. We ensure the skill sets and mindsets are embedded in your business using the following processes:

- » Tailor case studies and scenarios;
- » Reinforce personal accountability for ownership, change and growth;
- » Integrate Next Level Safety with existing risk management processes;
- » Build internal capability through train-the-trainer and internal champions;
- » Sustain results with post-program prompters and refreshers (via email, text, posters and manager coaching resources).
