Safety Culture Survey

CREATING CONFIDENCE THROUGH DATA-DRIVEN INSIGHTS

If you are like many organisations safety culture is a core aspect of your safety strategy or improvement plan. We throw the word culture around, but what does this mean and how do we measure it?

Our Safety Culture Survey has been designed to measure the maturity of your safety culture. It taps into the mindsets, behaviours and leadership practices that underpin next level safety. At Coretex Group, we believe your people are the solution. We tap into their experiences and ideas to create a high involvement safety culture.
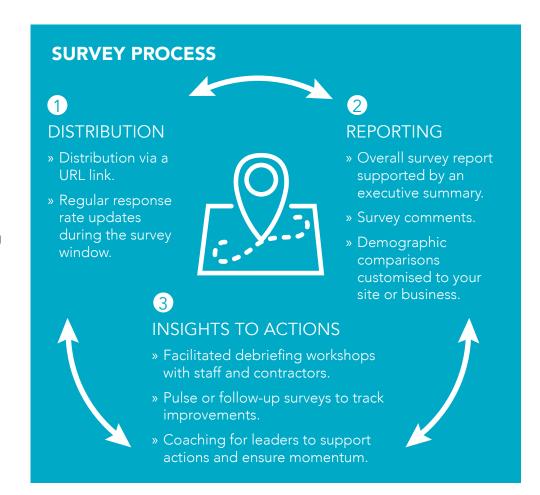

SURVEY DESIGN

We measure safety culture across six areas:

» Leadership

» Responsibilities

» Risk Management

» Systems and Procedures

» Psychological Safety

» Development and Coaching

SURVEY FORMAT

» Online (mobile compatible).

» 15-20 minutes to complete.

» Anonymous link.

» Customisable to your company branding.

» Demographics to support business area reporting and comparisons.

SURVEY PROCESS

1 DISTRIBUTION

» Distribution via a URL link.

» Regular response rate updates during the survey window.

2 REPORTING

» Overall survey report supported by an executive summary.

» Survey comments.

» Demographic comparisons customised to your site or business.

3 INSIGHTS TO ACTIONS

» Facilitated debriefing workshops with staff and contractors.

» Pulse or follow-up surveys to track improvements.

» Coaching for leaders to support actions and ensure momentum.

SAFETY CULTURE SURVEY OUTCOMES

1 To get a baseline measure of your safety culture.

2 To develop a targeted culture improvement plan, focused on strengths and development areas.

3 To embed and track improvements in your safety culture.
